Concrete Conservation, Repair, & Reinforcement Training

Wednesday, April 12, 2023 12:30-5:00 Eastern

Wednesday, April 19, 2023 12:30-5:00 Eastern

(Two Parts)

Virtual Seminar & Panel Discussion

Overview:
Welcome - Jack Pyburn, FAIA - Le Gros, APTT - Technical Committee for Historic Materials

Georgia.
Capacity in organizations such as APTT, the Society of Architectural Historians, American Institute of Architects, the Concrete Society, and the Americanuckland Institute for Conservation. These organizations focus on providing technical training to professionals in the field of concrete conservation.

Gina Crevello is the Principal of E具体 identified institution - Madison, NJ - Precast/Prestressed Concrete Institute: Case Studies of repair process and matching concrete.

Lloyd Weiss is Vice President of Protection, AIPW, Massachusetts Institute of Technology. His current research is on the consolidation of concrete materials and the durability of concrete structures.

Paul has also co-authored a chapter on reinforced concrete structures and material degradation. This work includes his research on the durability of concrete structures and the effects of environmental factors on concrete performance.

Since 1980, Mr. Gaudette has participated in the evaluation and repair of numerous significant mid-twentieth-century structures, including Fallingwater and the Guggenheim Museum. His current research is on the consolidation of concrete structures and the effects of environmental factors on concrete performance.

Concrete and steel frame and reinforced concrete structures are widely used in modern construction, and the durability of these materials is crucial for the longevity of these structures. This work includes his research on the durability of concrete structures and the effects of environmental factors on concrete performance.
