

In-person Workshop  
June 21-22, 2024

# Capitolizing on Technology: Preserving the Past and Inspiring the Future with Documentation Strategies at the Michigan State Capitol

Presented by the APT Technical Committee on Documentation and the APT Eastern Great Lakes Chapter

Join us at the Michigan State Capitol Building to experience first-hand the innovative use of strategic documentation underpinning the continuing renovation and repair projects at this site.

We will see how a “digital twin” of the building allows the Owner the ability to navigate the hidden infrastructure of a building digitally via a tablet device, maximizing the efficiency of future maintenance or repair efforts.

Experts will explore documentation strategies using the latest technology in:

- Laser scanning
- Integrated photogrammetry
- Hydrothermal monitoring
- Unmanned Aerial Vehicles (UAV)
- Historic Building Information Management (HBIM)

Come and take advantage of some “behind the scenes” access to the inner workings of the Michigan State Capitol Building and explore how an investment in a documentation strategy will benefit your projects.

## Mark Your Calendar!

**Friday, June 21st**

**8:30 am - 5:30 pm**

**Full day agenda with experts and dynamic group discussions**

*8 LU/HSW/PDH CEUs*

**Saturday, June 22nd**

**8:30 am - 11:00 am**

**Private tour - Exclusive behind the scenes access to the Capitol Building**

*2 LU/HSW/PDH CEUs*

### Location:

Michigan State Capitol  
323 Ottawa St.  
Lansing, MI, 48933

Sponsorship opportunities are available.
