Help Wanted, New York City and Ithaca, NY

Vertical Access LLC is a national consulting firm, providing inspection, documentation and diagnostic testing services in hard-to-reach locations, using industrial rope access techniques. While much of our work takes place on monumental historic buildings, we also work on more contemporary buildings, as well as infrastructure such as bridges, dams and industrial chimneys.

Vertical Access presently has an opening in our *Ithaca, NY* office for a candidate with *some combination* of the following qualifications:

- A working knowledge of architectural vocabulary gained through a background in engineering, architecture, construction, historic preservation or materials conservation
- Familiarity with historic and contemporary building systems and materials
- A rational fear of heights combined with the ability to work comfortably at heights
- Comfort with a wide range of work, from office to demanding physical effort on site
- Experience in industrial climbing techniques, rock climbing, caving or search and rescue
- A current SPRAT or IRATA certification is a plus.
- Experience with AutoCAD and/or other graphics design programs
- Since all of our field work takes place out of town, willingness and ability to travel is essential. Many jobs may require up to 2-3 nights out of town with 5-6 consecutive days being the occasional exception.
- Willingness to work within small teams of dedicated, congenial and cooperative professionals

We will make a long-term commitment to the right person and are willing to train.

Vertical Access is an equal opportunity employer. The ideal candidate will live in or near Ithaca, or New York City
