

Old Structures is hiring. We are looking for an engineer to join our team and work on building alteration, renovation, restoration, and investigation projects in and around New York.

Qualifications for the job:

- a Bachelor's or Master's Degree in civil engineering (structures concentration), structural engineering, or architectural engineering (structures concentration).
- Zero to three years work experience in structural investigation, design and analysis for buildings.
- Experience with CAD and structural analysis.
- Ability to work as part of a team.
- Ability to communicate clearly, both verbally and in writing.

Our engineers work on projects from the beginning (usually on-site investigation) through design, detailing, and construction. When a project is completed, you'll be able to say it was your project.

Salary offered will be commensurate with experience, \$73,600 to \$77,280 for entry level.

Our benefits include paid holidays, vacation, and sick days; health insurance for employee and family; 401(k) with automatic employer contribution.

Old Structures Engineering is an innovative and growing firm located in the Financial District. We specialize in work on existing structures, particularly historic buildings like the one our office is located in. More information can be found at www.oldstructures.nyc.

Please send your resume in PDF format to information@oldstructures.nyc. Only emailed resumes will be reviewed and only candidates for interviews will be contacted.
