

Looking for a self-motivated structural engineering candidate with experience or interest in historic preservation to work on a vast variety of interesting and unusual preservation projects throughout the New England Region. A degree in structural engineering and EIT certification is required, though a PE or SE registration is preferred. The ideal candidate would have analysis and design experience with wood, structural steel, reinforced concrete, masonry, and traditional construction materials. Pay ranges from \$37.50 to \$50.00 an hour and includes benefit options. Candidates should email [gmnnowak@structures-north.com](mailto:gmnnowak@structures-north.com) with a resume and an introductory letter.
