Anne de Fort-Menares Award Recipients

The Anne de Fort-Menares Award recognizes the article that best demonstrates excellence in the application of historical research to preservation practice published in the *APT Bulletin* during the year in which the award is conferred.

First presented in 1997, this award honors Anne de Fort-Menares (1956-1997), her many contributions to APT, and her dedication to historical research. Anne was an architectural historian and principal of Resource Data, a Toronto-based consulting firm specializing in heritage resource evaluation and management. Her background blended archaeological fieldwork in Carthage and Tuscany with public sector positions in policy, architectural history, and conservation planning. She taught architectural and design history at Queen's University, Kingston, and the Ontario College of Art in Toronto, and was the course director for the Ontario Museum Association's certificate course in historic buildings.
